{BOULEKCHAR CHIHAB-EDDINE}

Lead Web Engineer · Technical Consultant · Full-Stack Web Developer · Frontend Developer

Bridging product vision and production code with precision.

location: "Constantine, Algeria"

<summary>

// I build resilient, high-impact web products that solve real problems.
// Over the past six years, I've worked closely with business owners and product leads to take complex, messy workflows and turn them into intuitive web applications that just work.
// Whether it's architecting a custom management portal from scratch, stitching together reliable backend systems, or obsessing over frontend feel and speed, I treat every project like a living product—built to scale, perform, and drive actual value from day one.

<experience>

<Lead Web Engineer & Technical Consultant>
<Independent Practice, Remote / Global>
<2024 – Present>

// Taking ambitious web platforms from early whiteboards to battle-tested production.
// I partner directly with founders and product teams to engineer end-to-end web applications, custom management dashboards, and high-throughput APIs.
// My focus is writing clean, scalable code that turns complex operational bottlenecks into effortless, dependable digital products that businesses can run on.

<Full-Stack Web Developer>
<Contract Engagements, Remote>
<2022 – 2024>

// Turned product roadmaps into living software.
// Built responsive, high-performance web applications and internal tools with a heavy focus on speed, user delight, and bulletproof reliability.
// Handled everything from secure payment flows and user access controls to database tuning and real-time data syncs, shipping early, iterating fast, and closing critical delivery milestones.

<Frontend Developer>
<Freelance Services, Remote>
<2020 – 2022>

// Breathed life into static designs, translating complex UI mockups into snappy, pixel-precise web interfaces that felt natural on any screen.
// Obsessed over rendering speed, responsive layouts, and cross-browser consistency, setting high standards for visual polish and clean frontend structure from day one.

<education>

// Master's Degree in Information and Communication Sciences and Technologies (STIC)
// University of Constantine 2 - Abdelhamid Mehri
// 2018 – 2020

// Bachelor's Degree in Information and Communication Technologies (TIC)
// University of Constantine 2 - Abdelhamid Mehri
// 2015 – 2018

<skills>

<Languages>
// TypeScript, JavaScript, Python, Go, SQL

<Frontend>
// React, Next.js, Vue, Tailwind CSS, Redux

<Backend>
// Node.js, Express, NestJS, GraphQL, REST

<Databases>
// PostgreSQL, MySQL, MongoDB, Redis

<Cloud & DevOps>
// AWS, Docker, Kubernetes, Terraform, CI/CD

<Practices>
// System Design, TDD, Microservices, Agile, Mentoring

<projects>

<Enterprise Operations & Logistics Portal>
<role: Full-Stack Architect & Lead Developer>

// Designed and built a centralized web portal to streamline day-to-day operations and cross-team workflows. Replaced fragmented spreadsheets with an interactive real-time dashboard, granular role-based access, and automated data synchronization. The system cut down administrative bottlenecks dramatically and delivered a seamless interface tailored to high-frequency daily use.

<Commercial Transaction & Client Management Hub>
<role: Full-Stack Web Developer>

// Developed a dedicated client-facing platform focused on seamless onboarding, contract tracking, and secure payment processing. Engineered custom API integrations to bridge external payment providers with the core database, ensuring zero drop-off during checkout, ironclad transaction logging, and instantaneous record updates.

<Custom Workflow & Analytics Tool>
<role: Frontend & API Engineer>

// A lightweight, high-performance dashboard turning complex internal processes into a clean, single-screen workflow with instant data visualization.
